DropStop® PRINT KORREKTUR

Denne korrektur kontrolleres omhyggeligt med hensyn til:
• størrelse • placering • farvefordeling • stavemåde og andet.
Derefter sendes den korrigerede, underskrevne korrektur til os, også selvom den godkendes pr. telefon.

Vær opmærksom på, at farver kan variere fra print til det færdige produkt.

Sølvfolien vil skinne igennem farverne med mindre der er brugt hvid base under. Uden den hvide base under, vil farverne fremstå metallic på DropStop.

Der trykkes kun på 1 side.

DropStop® PRINT PROOF

Please, check this proof carefully as to:
• size • placing • colours • spelling etc.
Make your corrections, if any, and return the signed proof to us, even if approved by phone.

Please be aware that differences may occur between the print and the final product.

The silver shines through the printed colours unless white base colour is used underneath. Without the white base underneath, colours will appear metallic on the DropStop.

Print on one side only.
